DOG PARK UPDATE

Re-seeding of the large Dog Park (Grandview) began on October 20th. This results in the closure of the large park for approximately four weeks. If all goes well the large park will open about November 17th.

Construction of new double entry gates for both the large and small parks (Grandview) is scheduled to begin the second week of November. All efforts will be made to maintain access to the small park during this construction. However, there may be times when the park may need to be closed for brief periods during the day due to movement of construction equipment and materials.

As part of the gate installation there will also be repair to rusted fence stakes, the installation of new dog waste stations, and the repair of the gate between the large and small dog parks.

The watering schedule for the Dog Park is being adjusted due to seasonal changes and the end of Daylight Savings Time. The new watering schedule will be 3am and 8pm.

The NOLA Dog Park (Artisan and Grandview) has been opened by Toll Brothers and is available as an alternative location during any period of disruption for the large and small dog parks.

We apologize for the inconvenience that you may experience. This temporary disruption should lead to an improved experience for all who use the Dog Park.
